and transactional
digital signage
transitions
advertising to
sales and
valued customer
services.*

THE KIOSK I.D. TRANSACTIONAL DIGITAL SIGNAGE

KIOSK I.D. (Interactive Digital) provides a profitable bridge from traditional digital signage to transactional kiosk. This dual solution offers all the conventional attraction and advertising benefit of a 42" digital display and adds self-service sales transaction capability.

Advanced 3M MicroTouch DST touch screen technology provides a superior level of customer engagement and adds a valuable measurement element to digital advertising. KIOSK has integrated an insert credit card reader, dual speakers, and receipt printing functionality as options to bridge advertising investments into valued customer transactions and services.

Applications include advertising, wayfinding, events broadcasting, concierge / reservations, ticketing, and event registration. Options are limited only by the imagination and can be deployed in venues from shopping malls and hotels, to transportation hubs and stadiums.
