Check-Out

Enter room

Checkin

Sleep

Walk-in when arriving without a hotel reservation. This includes selecting an available room and completing the same steps as for regular check-in.

24 Check-in with a few simple steps. This includes completion of registration card, passport scanning, adding products and credit card payment.

STELLAR
TK-2100 Series

is a modular kiosk that can adopt to the specific environment to reinforce the branding or identity of the hotel. Specially designed for various self-service applications, this kiosk can be equipped with multiple transaction components providing versatile performance.

CHOPIN
HK Series

is a space-saving self-service hotel check-in/check-out kiosk for table or counter use. It is designed to assist hospitality applications in reducing queues, freeing hotel staff from repetitive tasks and increasing customer satisfaction.

Pick-up room keys in less than 30 seconds by scanning a QR code if pre-check-in was done online before arrival.

In-house (already checked-in guests) can use the kiosk to create an additional or replacement key.
WALLMOUNT
Design with a value

With this kiosk designed for outdoor use, your hotel guests are given the option of 24/7 check-in at any time of the day or night. Not only does this save you a great deal of effort and staff deployment, but your guests are also flexible and do not have to comply with queues or opening hours.
